

Ahmad Alfaisal

DevOps & Cloud Engineer

📍Ingolstadt, Bavaria, Germany ✉ahmad.alfaisal@proton.me ☎+491776971407
🌐in/ahmad-alfaisal 🐙github.com/TheChilledCloud 🇩🇪German Nationality

Software engineer with experience in automation, CI/CD, containerization, and tool development. Implementation of international projects for government agencies and industry, currently focused on efficient software delivery and modern infrastructure.

COMPETENCIES

Python | Linux | Docker | Kubernetes | GitHub Actions | AWS | Terraform | Prometheus | Grafana | ML | SQL

PROJECTS

Microservices E-Commerce Platform on AWS (Google Online Boutique)

Implementation of a scalable microservices architecture (Google Online Boutique) on AWS EKS; fully automated CI/CD pipeline (GitHub Actions) with Infrastructure as Code (Terraform) and monitoring (Prometheus/Grafana).

Cloud-Native DevOps-Pipeline

Containerized application with orchestration (K8s/ECS); automated CI/CD (Github Actions) with Infrastructure as Code (Terraform) and monitoring stack (Prometheus/Grafana)

Automated Container Deployment Pipeline

CI/CD pipeline (Github Actions) for automated Docker image builds and deployment to AWS ECR with Infrastructure as Code (Terraform)

PROFESSIONAL EXPERIENCE

Esprit Engineering GmbH

Software Engineer

July 2023 - Today
Ingolstadt, Germany

Volkswagen Projects:

- Containerized development tools with Docker for consistent build environments
- Utilized CI/CD pipelines for automated software testing and integration
- Created cross-platform packages (NuGet/Debian) for optimized deployment
- Developed MATLAB/SIMULINK tools to simplify development processes

BMW Projects:

- Independently developed and implemented a LIN-CAN communication system for real-time integration of vehicle data

TU Kaiserslautern

Software Engineer

August 2022 - April 2023
Kaiserslautern, Germany

- Developed LSTM/RNN models to predict human movements (92% accuracy)
- Preprocessed sensor data and validated results using Mean Absolute Error

PROFESSIONAL EXPERIENCE

RPMA Networks

Solution Engineer

Juli 2017 - Juni 2019

Dubai, United Arab Emirates

- Successfully delivered 2 large IoT projects for government agencies in the UAE
- Conducted technical training sessions and proof of concepts (PoCs)
- Worked directly with customers to solve technical challenges and align with business objectives
- Collaborated with cross-functional teams to define feature roadmaps and prioritize tasks based on customer feedback

EDUCATION

M.Sc. Embedded Systems Engineering

2023, TU Kaiserslautern, Germany

B.Sc. Mechatronics Engineering

2017, Eastern Mediterranean University, Cyprus

CERTIFICATES

Docker Foundations Professional Certificate

2025, Online - LinkedIn Learning

DevOps Beginner to Advanced

2025, Online - Udemy
